# Aquatech Non-Destructive Testing Services

Category: Web Development

Development Status: Completed

Project Date: January 2007

Details: Aquatech Non-Destructive Testing Services (ANDTS) is a Trinidad based industrial company. When they decided to have an corporate presence online, they faced high development costs, delays, and non-delivery of services from a private consultant. Luckily they came across Rizon, who stepped up to provide a solution within a few days.

Rizon provided ANDTS with consulting services, and helped them decide how to minimize the costs and risks associated with deploying a website. Rizon custom developed a layout and template, and implemented a CMS system for their website. Going beyond that, Rizon provided on-site, and electronic training on using the CMS to manage the ANDTS website.

So if you need a corporate website yesterday, we're the ones to call!
