

L.J. Williams Limited

Category: Application Development

Development Status: Completed

Project Date: August 2005

Details: Who do you call when you need to make changes to an archaic FoxPro 2.5 application yesterday and you don't have the source code, compiler, or decompiler? L.J. Williams Limited turned to Rizon to provide just such a solution.

Using some old school hex editing tricks, Rizon was ready to deliver literally overnight. Incidentally, that day at 3:15am, L.J. Williams Limited became Rizon's first official client.
