

Manzanilla High School

Category: Hardware and Networking

Development Status: In Progress

Project Date: December 2005 - Present

Details: Managing 50+ computers, printers, servers, and networks in a public school environment can be a daunting task, especially when Murphy's Law takes effect. Rizon has provided next-day on-site service, repair, upgrade, and maintenance work on every aspect of the I.T. infrastructure at Manzanilla High School.

Working closely with the school, Rizon has made several assessments and recommendations to the school board and to the Ministry of Education.
